Safe Use of Oxycodone

Because **Oxycodone** is a **potent opioid**, it's important to use it safely. Here are some key safety tips to follow:

- **Take as prescribed:** Always follow your doctor's instructions and take Oxycodone at the prescribed dosage. Do not take more than prescribed.
- **Avoid alcohol and sedatives:** Combining Oxycodone with alcohol or other sedative drugs can increase the risk of dangerous side effects, such as **respiratory depression**.

- **Watch for side effects:** If you experience unusual symptoms like dizziness, difficulty breathing, or excessive sedation, consult your healthcare provider immediately.
- **Do not stop abruptly:** If you want to stop taking Oxycodone, consult your doctor first. Discontinuing it suddenly can lead to withdrawal symptoms.
