## What Is Belbien & How Does It Work?

**Belbien (zolpidem)** is a sedative-hypnotic medication designed specifically for short-term insomnia treatment. It works by targeting areas of the brain responsible for sleep, helping you relax and fall asleep quickly.

## Doctors prescribe Belbien for:

- **Difficulty falling asleep**
- **Restlessness before bedtime**
- **Frequent nighttime awakenings**
- **Temporary insomnia caused by stress or routine changes**
- **Jet lag or disrupted sleep schedule**

Once taken as directed, Belbien helps:

- **Calm the mind**
- **Regulate sleep patterns**
- **Improve overall sleep quality**

Most users experience faster sleep onset and deeper, more refreshing rest.
