What is Farmapram 2Mg?

Farmapram 2Mg is a **prescription medication** commonly prescribed for the management of anxiety, panic attacks, and certain sleep disorders. It belongs to a class of medications known as **benzodiazepines**, which work by calming the central nervous

system. This helps reduce symptoms of anxiety, stress, and tension while promoting a sense of relaxation.

The 2Mg dosage is suitable for many adult patients, though your doctor may adjust the dosage based on your individual needs. Farmapram 2Mg is valued for its **fast-acting effect** and reliability in improving overall mental well-being.
