What The Great Flood Movie is About

The Great Flood is a South Korean sci-fi disaster film by Kim Byung-woo. It premiered on Netflix on December 19, 2025. The film features Kim Da-mi as Gu An-na, an AI researcher, and Park Hae-soo as Son Hee-jo, a security officer. The story takes place during a massive global flood that has submerged cities and disrupted life as we know it. An-na and her young son, Ja-in, find themselves trapped in a flooded high-rise. As the water rises, they fight to survive while facing a mysterious mission that could change humanity's future.

The Great Flood goes beyond the disaster genre. It transforms into a sci-fi thriller with AI twists and high stakes for humanity. This combination places it at the crossroads of natural disaster films and futuristic narratives.

Plot Overview (Spoiler-Free)

In this *The Great Flood* review, we will highlight key moments without giving away spoilers. The story kicks off with a familiar flood disaster: heavy rains and rising waters engulf a major city. Survivors rush to find safety on higher floors. An-na, her son Ja-in, and other residents climb toward the rooftop as water fills their building. Their struggle captures the tension and survival instincts at the heart of the survival disaster genre.

As the story unfolds, outside forces and hints of a larger crisis shift *The Great Flood* movie from a basic disaster tale. Reviewers note that the disaster acts as both a physical and symbolic pressure on characters. This tension leads to surprising developments [Heaven of Horror]. This change aims to deepen the emotional and thematic impact beyond mere spectacle.

Performances and Characters

The emotional core of *The Great Flood* review is Kim Da-mi's performance as An-na. She captures a mother's strong desire to protect her child while facing growing global threats. The chemistry between her and young actor Kwon Eun-seong enriches the personal story during the planetary crisis. Park Hae-soo's role as Hee-jo adds depth, grounding the film's more imaginative aspects.

Supporting characters add depth to the story, but some critics argue they lack development.

This is especially true as the plot shifts to bigger sci-fi themes. Despite this, the cast's dedication keeps the audience engaged during slower moments and genre changes.

Direction and Technical Craft

Director Kim Byung-woo dives into *The Great Flood* movie with clear ambition. He mixes disaster movie elements with sci-fi visuals. The film powerfully conveys claustrophobia and rising danger, especially when characters deal with towering floodwaters. Its sound design and production quality boost immersion, adding tension found in flood disaster and survival films.

The film's bold choices have split critics. Some admire the effort to elevate disaster storytelling. Others feel the sci-fi elements lessen the genre's emotional punch. This risk makes *The Great Flood* tough to categorize as a standard disaster movie. It mixes genre features with an existential twist.

Is The Great Flood Worth Watching?

So, is The Great Flood movie worth watching? The answer depends on what viewers expect.

If you want pure adrenaline from disaster and survival tension, this film has memorable scenes and emotional stakes early on. But if you prefer traditional flood disaster movies, the shift to a sci-fi story might feel less satisfying.

For fans of natural disaster movies and climate disaster movies, this film offers a fresh take. However, it strays from typical Hollywood formulas and can feel disjointed. Some critics point out that its complex themes may hurt the pacing and clarity [Korea Times]. Still, the film shines through its emotional core—the bond between parent and child—and strong performances that keep it engaging at times.

When it comes to the Best Disaster Movies of 2025, The Great Flood may not be the top pick. However, it grabs attention for its ambitious storytelling and unique mix of genres.
