What is Farmapram 2Mg?

Farmapram 2Mg is a prescription medication prescribed for the management of:

- Anxiety
- Panic attacks
- Certain sleep disorders

It belongs to a class of medications called benzodiazepines, which work by calming the central nervous system. This helps reduce stress and tension while promoting relaxation. The 2Mg dosage is suitable for many adult patients, though your doctor may

adjust it based on individual needs. Farmapram 2Mg is valued for its fast-acting effect and reliability in improving mental well-being.
