Managing your Avast subscription correctly is essential to avoid unwanted renewal charges, maintain control over your billing preferences, and ensure your cybersecurity protection matches your current needs. Many users mistakenly believe that uninstalling Avast automatically cancels the subscription; however, billing continues unless changes are made through the official Avast account system.

- Real-time malware protection
- Web and email security
- Identity monitoring
- Multi-device coverage

3. How Avast Auto-Renewal and Billing Works

 **1-802-557-0358**

Avast subscriptions usually have **auto-renewal enabled by default**. This feature ensures uninterrupted protection but may lead to unexpected charges if not monitored.

 **1-802-557-0358**

When auto-renewal is active:

- Your payment method is charged automatically
- Billing occurs at the end of each cycle
- Protection continues without interruption

Disabling auto-renewal allows your plan to expire naturally while keeping protection active until the paid term ends. To verify renewal status or billing dates, contact:
