## What is Dilaudid?

Dilaudid is a highly potent opioid used to treat moderate to severe pain. It works by binding to specific receptors in the brain and spinal cord, helping to reduce the sensation of pain. It is often prescribed to patients who have not responded well to other pain medications or when pain is particularly severe.

Dilaudid is available in various forms, including tablets, oral liquid, and injectable solutions, allowing for flexible treatment options based on individual

needs. However, like all opioid medications, Dilaudid should be used with caution, as it can be habit-forming. This is why it is crucial to follow your healthcare provider's instructions carefully.
