### What Is Farmapram?

[Help](#)

Farmapram (alprazolam) is a prescription medication commonly used to treat anxiety and panic disorders. It works by calming the central nervous system to reduce stress and nervousness. Farmapram contains the same active ingredient as Xanax, but is widely available in Mexico. Due to its potential for misuse, it is tightly regulated and requires a prescription from a licensed healthcare provider in the U.S.

## Why “Instant No-Rx Farmapram” Sites Are Unsafe

Websites offering *instant Farmapram* or *no-prescription sales* with fast shipping are illegal and dangerous. These unverified sources often:

- Sell counterfeit or contaminated pills
- Skip essential medical evaluations and dosage checks
- Violate FDA and DEA regulations
- Provide no oversight from licensed pharmacists

Always opt for legitimate, licensed healthcare services to ensure your safety and health.
