What is Xanax?

Xanax belongs to the benzodiazepine class of medications. It works by enhancing the activity of gamma-aminobutyric acid (GABA), a neurotransmitter that calms overactive brain activity. This effect helps reduce anxiety, prevent panic attacks, and stabilize mood. As a Schedule IV controlled substance, Xanax is effective and safe when taken as prescribed. Patients looking to **buy Xanax online** should always use verified and licensed online pharmacies to ensure authenticity and safety.

Forms and Strengths
